

# 640ID **Instantly Customized ID Format**

*The latest Mobilized Mini-Lab - your own business anywhere!*

- **The best investment for your business** - The 640ID delivers high quality, professional color photos for an exceptional price.
- **Eliminate the use of a PC** - Instantly preview and edit images on the built-in LCD screen before printing.
- **Get Creative!** The 640ID allows users to intermix multiple images and formats on the same printout, with ease.
- **Ultra Convenient** - Print brilliant images directly from a wide variety of media cards.

With HiTi's latest 640ID photo printer, printing exceptional memories has never been so simple. In addition to the customized ID formats, it also includes a convenient function that enables the user to print different sizes and images onto the same paper. Users can retrieve photos directly via a variety of memory cards, and then use the dynamic previewing and editing options on the built-in LCD controller. These exciting features make printing simple, worry-free, and eliminate the need to use a bulky PC.

**Hi-Touch Imaging Technologies**

## 1. LCD wizard windows:

### Premium quality display screen

The HiTi 640ID includes a LCD controller which allows the users to clearly view the image and be certain that it is the image that they wish to print.

### Dynamic previewing and editing functions

Via the LCD controller, users can choose an image, make any necessary adjustments to the color, size, or rotation, and print the crisp, colorful and true-to-life image. Through the LCD controller, the wrong picture will no longer be printed out and wasted, and the users will never need to adjust an image. This will inevitably lower your operating costs and save you valuable time. All of this will add up to larger profits for you!

## 3. ID photo:

With an array of ID formats already built-in, the HiTi 640ID can set up a particular ID size to suit the different demands and restrictions in each country. Get creative! Get even more value from your investment with the added ability to print different images and various image sizes onto the same paper.

For this exclusive service, please contact your HiTi sales/distributors to get more information.

## 4. Set up:

### Adjustable color preference

To satisfy individual preferences, the user is able to setup the color adjust to suit their own taste, and save this setting value via the LCD controller. Therefore, the users will no longer need to continuously adjust the settings, and the color of the photos, because they will have automatically been modified.

### ID-Count function

In the SETUP options, the HiTi 640ID also provides an ID-Count function. By utilizing this new function, the 640ID can automatically calculate and memorize a certain number of prints for each ID photo.

### "Matte surface" effect

Also included in the SETUP options are various built in graphics. \* By using these graphics, you will be able to create a unique "watermark" and "matte surface" effect on your own, uniquely patterned photos, with infinite imagination.

※ To utilize this option, a PC will be required.

## 2. Twin Slots Multi Memory

### Cards Compatible:

#### Stand-alone printing

Being memory card compatible enables users to print photos directly without the use of a bothersome PC. The HiTi 640ID accepts six memory cards, including: Compact Flash (CF), SmartMedia (SM), Memory Stick (MS), Secure Digital (SD), Multi Media Card (MMC) and IBM Micro Driver. Simply insert the compatible memory card into the slot and then use the convenient LCD to print your images.

## 5. Edit:

### Rapidly modify and fine-tune images before printing them out

The 640ID provides Brightness, Contrast, Color R/C, Color B/Y, Sharpness, Move, Rotate, Resize, and Copies adjusting options. Therefore, prior to printing an image, the user can adjust and preview the image that will satisfy each user's preferences.

## 6. Magic Coating Technology:

A revolutionary top coating protects your prints by sealing the layers onto the paper. This safeguards the images from UV lights, fingerprints, and even water. There is no smudging, running, or blotching because your prints are dry and ready to touch as soon as they leave the printer.
